Android App

1. Tic-Tac-Toe

This is a basic android app that was created in order to learn Android Development as well as learn Java with it. Tic-Tac-Toe was chosen because of the creative freedom it provides for the developer thus giving them a wide field to play around with various topics of Android development,
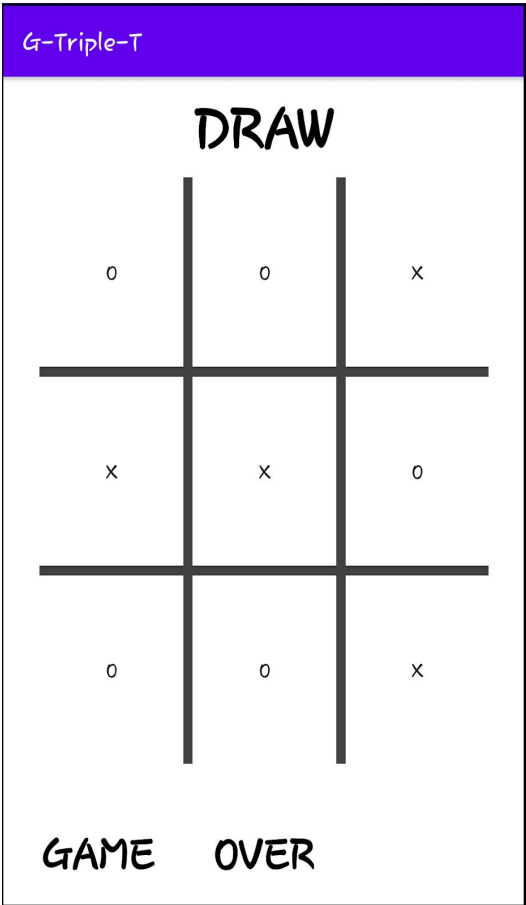

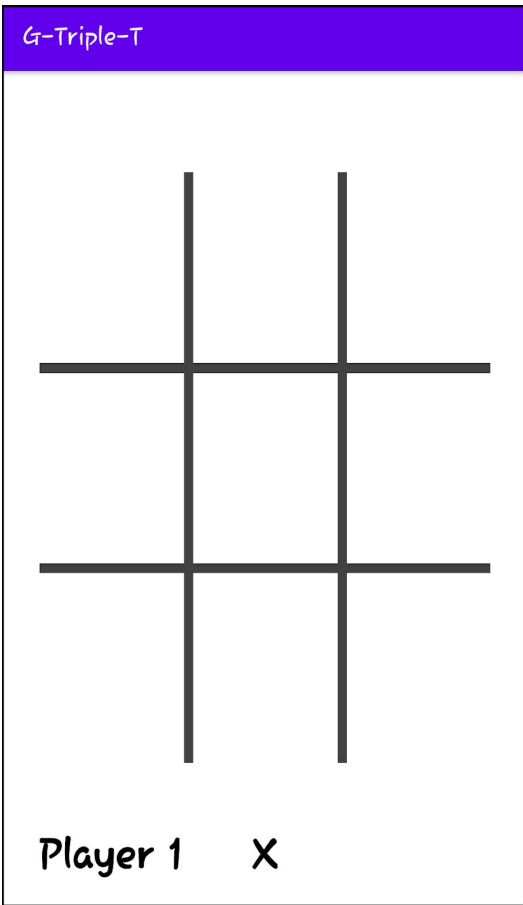

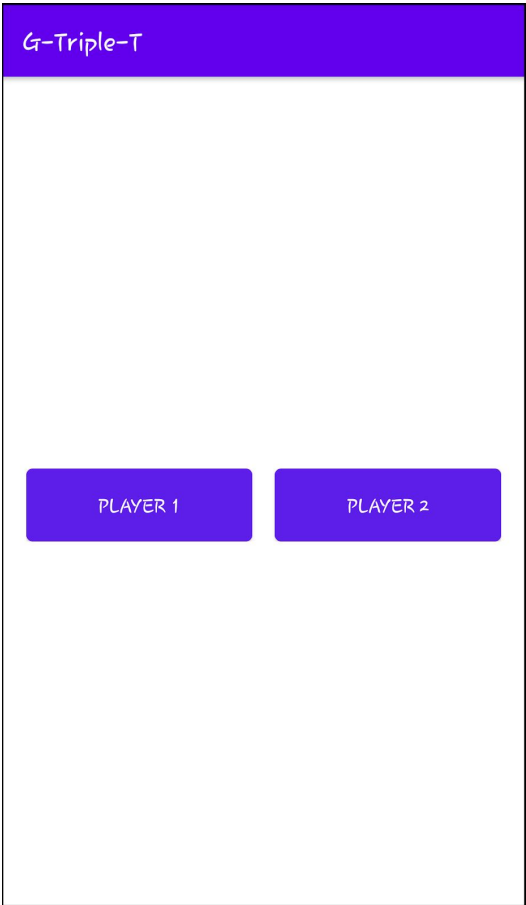

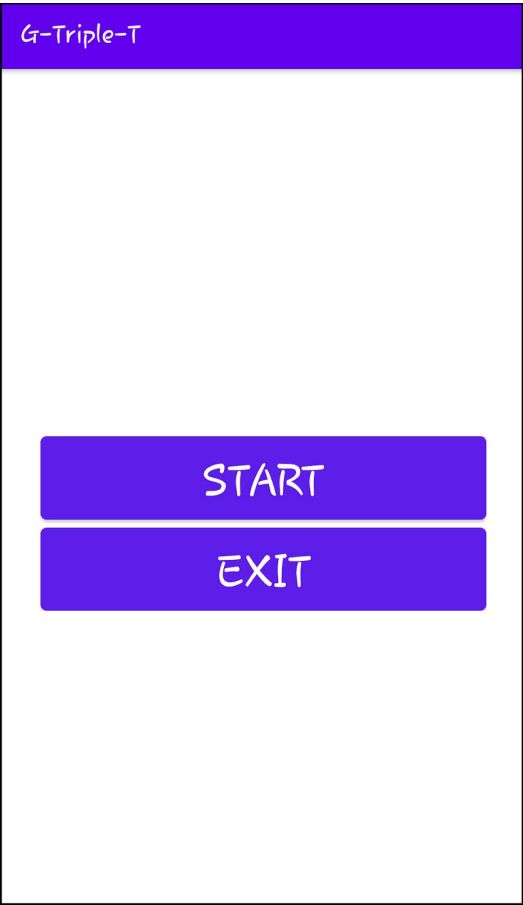

- Views

- Intents

- Button and their properties

- ImageButton and their properties

- Multiple Activities and interaction between them

- Activity updation due to various events

- Textviews

- Grid Layout

- Linear Layout (horizontal/vertical)

- Spaces and Lines

- Themes and Colors

Doing this project gave a lot of opportunities to try out various things and also understand the basic workflow required for an Android Developer.
